

Igni Tech

Open box - connection manual for motorcycle Yamaha DT125

Connection

There leads 4 wires from speedometer to white sealed connector (white/black, red/blue, blue a black). Disconnect this connector and insert appropriate connectors from Open box to this point. Disconnect 2pin connector at wires leads from front brake switch (wires green/yellow and brown). This connector is under headlight. Insert connectors from Open box to this point.

Here is process of connection at pictures below:

1. decoupling of headlight

2. identification of connectors

3. connection of Open box
